Munich edition · Price: one missed paragraph

INSIDE ▸ PAGE 2
87,355 SOLD. THEN AXED.

LETTER DOWN!

2,193,869 CARS RECALLED

Not a crash. Not a fire. A font size.

WHAT. The letters on the brake, park and ABS warning lights were too small for the US rulebook.

WHO SPOTTED IT. Not the carmaker. The regulator, in a routine check.

WHICH CARS. Model S, X, 3, Y and Cybertruck, built 2012 to 2024.

ALSO: 31 million recalled in one year ▸ PAGE 3

Now picture all of them in one car park. (AI illustration)

3.2 mm minimum letter height. Theirs were smaller.

EU RULE SHOCK

87,355 SOLD. THEN BOXED OUT.

New EU cyber rule: no pass, no registration. The Porsche Macan didn’t pass.

OFF EU FORECOURTS

~~PORSCHE MACAN~~

~~VW UP!~~

~~BOXSTER & CAYMAN~~

~~VW T6.1~~

Since July 2024 every new car in the EU must meet UN R155. The 718 platform is older than the rule. Porsche won’t convert it.

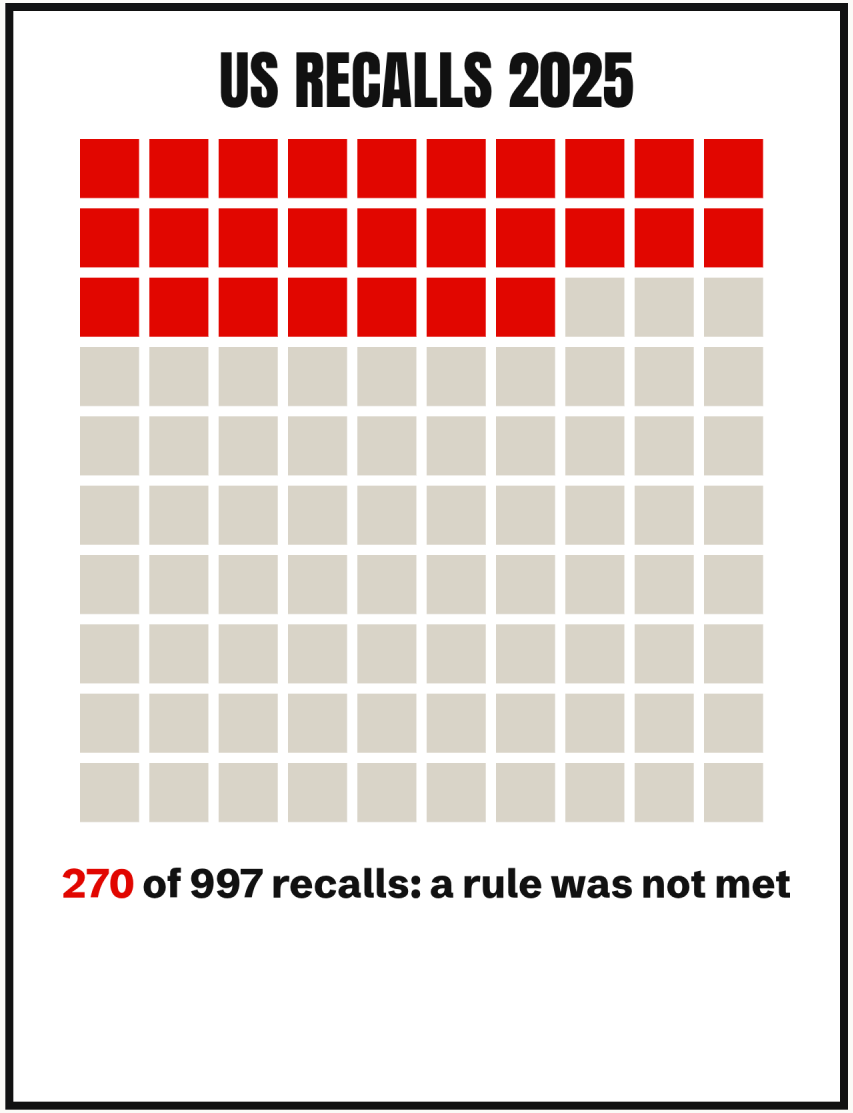

87,355 = Macan deliveries worldwide, 2023 (Porsche). Sources: Porsche, Carscoops, Motor1 · Photo: F. H. Nielsen / Unsplash (symbolic)

THE SHAMEFUL TRUTH

31 MILLION RECALLED.

IN ONE YEAR. AND 1 IN 4 TIMES, NOTHING WAS EVEN BROKEN.

Not faulty parts. Missed paragraphs.

Source: NHTSA 2025 Annual Recalls Report (997 recalls, 31.3 million units, 270 compliance recalls)

TODAY? BY HAND.

56
regulations to check

4
actually apply

190
obligations on 53 pages

Search finds documents. Not obligations.

One rear lamp, from the challenge's worked example (Certivity's reference answer)

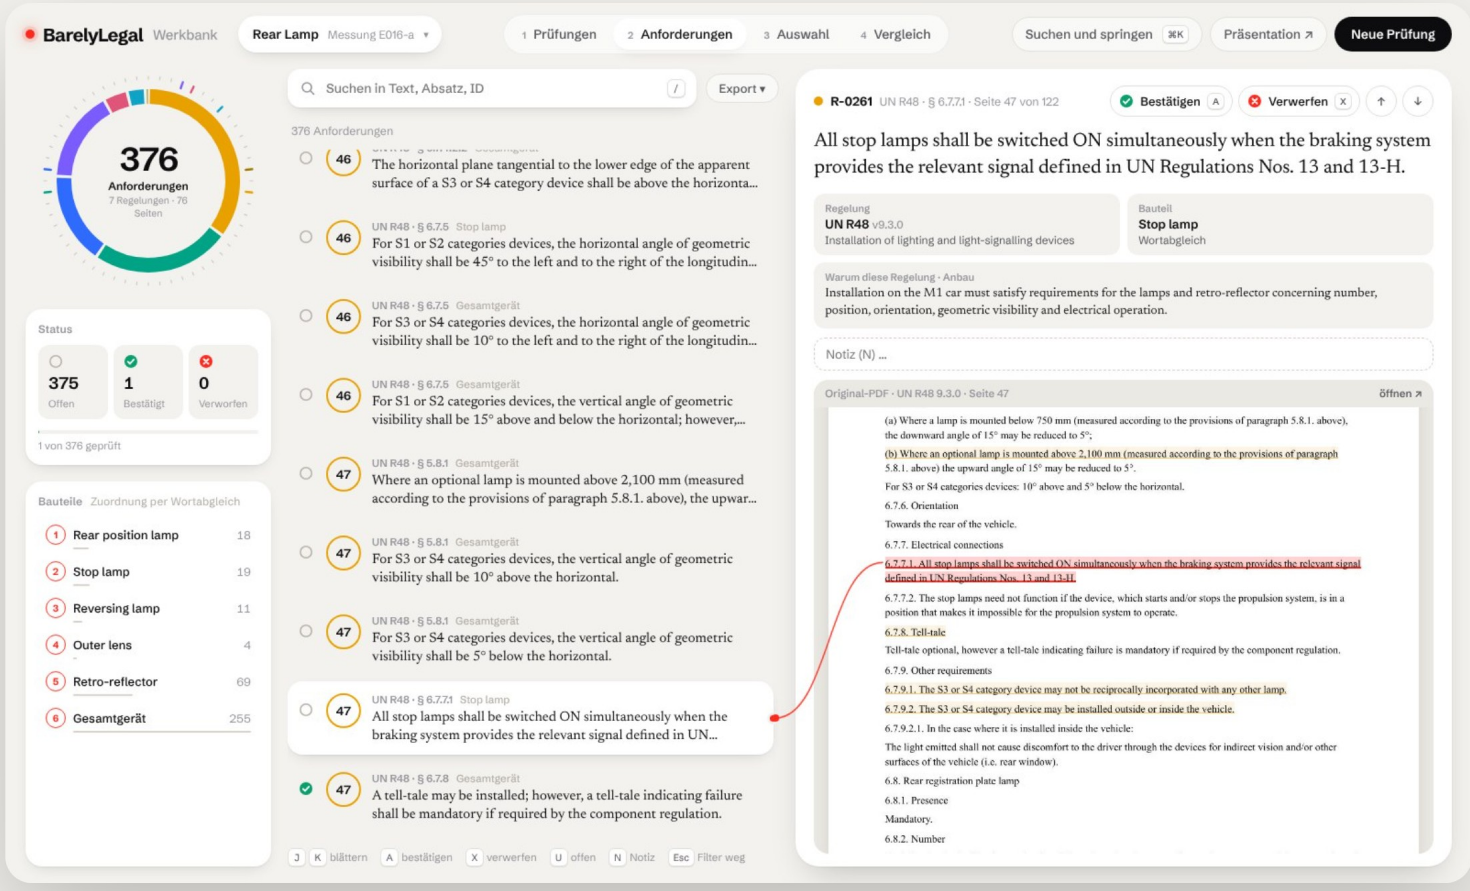

BarelyLegal

SPEC IN. EVERY RULE OUT. WITH PROOF.

1 Pick the regulations

2 Pull every obligation

3 Link it to the page

Real product, real data: our best run, every obligation one click from its source page.
